

KANISHKA YADAV

San Jose, CA | 11kanishkay@gmail.com | linkedin.com/in/kanishkayadvv | github.com/kanishkay

EDUCATION

San Jose State University

Bachelor of Science in Data Science

Relevant Coursework: Data Structures and Algorithms, Artificial Intelligence, Computer Systems, Database Management Systems, Object-Oriented Design

San Jose, CA
Expected May 2027

EXPERIENCE

7-Eleven

Break Through Tech AI Studio Fellow

- Partnered with 7-Eleven on an industry AI challenge through Break Through Tech, engineering machine learning pipelines.

Irving, TX
Aug. 2026 - Present

SAP America, Inc.

AI Software Developer Intern

- Worked with Cloud Infrastructure Automation workflows, supporting enterprise deployment pipelines and system synchronization.

Palo Alto, CA
Jun. 2026 - Aug. 2026

AGENTIS

Co-Founder & AI Engineer

- Co-founded a clinical trial matching platform integrating IBM watsonx.ai and ClinicalTrials.gov REST APIs.
- Developed patient-profile parsing and multi-criteria evaluation algorithms generating explainable match rationales.

San Jose, CA
Feb. 2026 - Aug. 2026

Break Through Tech

AI Fellow

- Selected among 4,300+ applicants for a 12-month fellowship in machine learning, deep learning, and scalable systems.

National
May 2026 - Present

FEATURED PROJECTS

AGENTIS - AI Clinical Trial Matching Platform

- Multi-agent system evaluating clinical eligibility criteria with explainable scoring for clinical research coordinators.

IBM watsonx.ai, Python, FastAPI, ClinicalTrials.gov API

AutoPilot AI - Autonomous Auto Repair Advisor

- Built an end-to-end multi-agent service advisor automating repair workflows with human-in-the-loop validation.

NVIDIA Nemotron, Holo Agent, Next.js 16, TypeScript, Docker

Acron - Semantic Codebase Knowledge Base

- Local-first semantic code search embedding repository code with AST-aware chunking and vector similarity retrieval.

Python, Flask, sqlite-vec, SentenceTransformers, Tree-sitter

ContextMeter - AI Agent Context Observability

- Real-time context degradation and token optimization suite for multi-turn LLM pipelines with structured schema validation.

TypeScript, Express, React, Vite, Gemini API, Zod

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, R, TypeScript, HTML/CSS

Frameworks: PyTorch, TensorFlow, Scikit-learn, SentenceTransformers, FastAPI, Flask, Express, React, Next.js

Tools & Infra: Docker, Kubernetes, Ansible, Git, GitHub, PostgreSQL, MySQL, SQLite, sqlite-vec, Linux
